## COVID-19 State Reports

### CDC COVID-19 Community Levels

#### 1. COVID-19 Community Levels used for Most Settings

Layered prevention strategies can help limit severe disease and reduce potential strain on the healthcare system. [CDC COVID-19 Community Levels](#) are a tool to help communities and individuals determine what prevention measures to take.

The COVID-19 community level is determined by the higher of the new hospital admissions and inpatient beds metrics, based on the current level of new cases per 100,000 population in the past 7 days. COVID-19 community levels are classified as low, medium, or high as follows:

New COVID-19 Cases Per 100,000 in the past 7 days	Hospitalization Indicators (7-day total)	COVID-19 Community Levels		
		Low	Medium	High
Fewer than 200	New COVID-19 admissions per 100,000 population (7-day total)	<10.0	10.0-19.9	≥20.0
	Percent of staffed inpatient beds occupied by COVID-19 patients (7-day average)	<10.0%	10.0-14.9%	≥15.0%
200 or more	New COVID-19 admissions per 100,000 population (7-day total)	NA	<10.0	≥10.0

The following table includes recommendations for protecting yourself, your family, and communities. Additional information can be found at: [https://www.cdc.gov/coronavirus/2019-ncov/science/community-levels.html#anchor\\_47345](https://www.cdc.gov/coronavirus/2019-ncov/science/community-levels.html#anchor_47345).

**Local Levels:**

Somerset County:

**LOW**

Morris County:

**LOW**

## Helpful COVID-19 Resources

Are you eligible for a COVID-19 booster dose?

[Check out the CDC Vaccination Schedule](#)

PLEASE NOTE: IF YOU HAVE ALREADY RECEIVED AN UPDATED, BIVALENT BOOSTER DOSE, YOU ARE CURRENTLY UP-TO-DATE ON YOUR VACCINATIONS. THERE IS NO RECOMMENDATION TO GET ANOTHER UPDATED BOOSTER DOSE.
