### COVID-19 Vaccines for Children and Teens

Although fewer children have been infected with COVID-19 compared to adults, children can:

- Be infected with the virus that causes COVID-19.
- Get sick from COVID-19.
- Spread COVID-19 to others.

**CDC recommends everyone 12 years and older should get a COVID-19 vaccination to help protect against COVID-19.** Widespread vaccination is a critical tool to help stop the pandemic. People who are fully vaccinated can resume activities that they did prior to the pandemic. Learn more about what you and your child or teen can do [when you have been fully vaccinated](#). Children 12 years and older are able to get the [Pfizer-BioNTech COVID-19 Vaccine](#).

Getting a COVID-19 vaccine can help protect your child from getting COVID-19. Early information shows that the vaccine may help keep people from spreading COVID-19 to others. They can also keep your child from getting seriously sick if they do get COVID-19.

[Find a COVID-19 vaccine for your child.](#) Check local pharmacy's websites to see if vaccination walk-ins or appointments are available. Check with your child's healthcare provider about whether they offer COVID-19 vaccination. Some schools have been working with local or county health departments to vaccinate students, so check with your school district.

### Weekly Update → Bi-monthly Update

Following this week's update the BTHD will move to 2x a month updates in this format. We will still be sending out alerts about COVID-19 testing and vaccine clinics. To make any changes to the alerts you receive please log into your account on [www.smart911.com](http://www.smart911.com). To sign up for alerts, create a Smart 911 account [here](#). For support with the Smart911 system such as a forgotten username or password visit the Smart911 support [page](#).
