Stay Healthy this Holiday Season with **COVID-19 Vaccine Clinics** and **COVID-19 Testing Clinics!**

COVID-19, Flu, RSV or a Cold? Check your child's symptoms

How To Tell Them Apart

Common symptoms of all four illnesses include fever, cough, fatigue, stuffy, runny nose and congestion. Some symptoms that may be different include:

Illness	Sudden loss of taste or smell	Headache	Loss of appetite	Sore throat	Sneezing
COVID-19	✓	✓	✓	✓	
Flu		✓	✓	✓	✓
Cold				✓	✓
Respiratory syncytial virus (RSV)					✓

COVID, Flu & RSV: How Are These Respiratory Illnesses Different?

1. COVID-19 Community Levels used for Most Settings

Layered prevention strategies can help limit severe disease and reduce potential strain on the healthcare system. [CDC COVID-19 Community Levels](#) are a tool to help communities and individuals determine what prevention measures to take.

The COVID-19 community level is determined by the higher of the new hospital admissions and inpatient beds metrics, based on the current level of new cases per 100,000 population in the past 7 days. COVID-19 community levels are classified as low, medium, or high as follows:

COVID-19 Community Levels				
New COVID-19 Cases Per 100,000 in the past 7 days	Hospitalization Indicators	Low	Medium	High
Fewer than 200	New COVID-19 admissions per 100,000 population (7-day total)	<10.0	10.0-19.9	≥20.0
200 or more	Percent of staffed inpatient beds occupied by COVID-19 patients (7-day average)	<10.0%	10.0-14.9%	≥15.0%
	New COVID-19 admissions per 100,000 population (7-day total)	NA	<10.0	≥10.0

The following table includes recommendations for protecting yourself, your family, and communities. Additional information can be found at: https://www.cdc.gov/coronavirus/2019-ncov/science/community-levels.html#anchor_47145.
